Everything about aluminum.

ABİR METAL
PLASTİK KALIP SAN. LTD. ŞTİ.

HAKKIMIZDA

Abir Metal Plastik Kalıp San. Tic. Ltd. Şti , 2000 yılının sonuna doğru Mustafa Acar tarafından İstanbul'da kurulmuştur. Kurulduğu yıldan itibaren istikrarlı bir şekilde gelişimi dikkate alan üretici bir firma olup hem yurtçi hem de yurtdışına ithalat ve ihracat yapmaktadır.

Firmamızın başlıca faaliyet alanı , aluminyum kapı ve pencere aksesuarı üretimi üzerinedir ve bu sektördeki müşterilerimizin tüm taleplerini karşılayabilecek bir çözüm ortağıdır. Firmamızın ürettiği ürünleri , Irak , İran , Cezayir , Lübnan , Türkmenistan gibi bir çok ülkeye ihraç etmektedir. Bunun yanı sıra Siegenia , G-U , Roto ve kale gibi büyük aluminyum aksesuar üreticilerinin de ürünlerini bünyemizde bulundurmaktayız.

Standartların dışına çıkip üretilen ürünlerin yanısıra özel müşteri şartnameleri ve isteklerine göre de üretim yapabilmektedir. Ürünler kullanıldığı ortama uygun renk seçenekleri ile uzun süre görünüm ve işlevlerini kaybetmeyecek şekilde dizayn edilmekte , üretimin her aşamasında ve özellikle de son kontroller sırasında test edilip yüksek kalitede müşteriye özenle ulaştırılmasını sağlamaktadır. Sahip olduğumuz ISO 9001:2018 ve TSE belgemiz ile üretmiş olduğumuz ürünlerin yüksek kalitede olduğunu göstermektedir.

Firmamızın 2011 yılının Mart ayında tescil ettiği "AXİST" markası ile çeşitlilik , kalite ve müşteri odaklılık anlayışıyla bu sektörde oldukça belirgin ve ayrıcalıklı bir konum kazanıp siz değerli müşterilerimizin ürün kalitesi ile performans beklentilerini karşılamayı ve müşteri memnuniyetlerini artırmayı amaç edinmiştir.

Atölye olarak başladığımız bu sektörde , ismimizi duyanların yüzlerinde tebessüm ile gönüllerinde taht kurarak her yıl daha da genişleyen ithalat ve ihracatı ile Türkiye ekonomisine katkı sağlamak başlıca amaçlarımızdandır.

ABOUT US

Abir Metal Plastic Mold Industry Trading Limited Company is founded by Mustafa Acar in Istanbul in 2000. The founder and manager of the company is a professional, has an average of 20 years of experience in aluminium and metal sector. He has taken key roles in all positions from atelier workshops to top management.

Abir Metal company provides comprehensive management and coordination of all activities at all stages such as pre-development, pre-production (samples, workshops, etc), development, production and post-production of mainly Aluminium Door and Window accessories. Abir Metal is also producing the products of prestigious brand's such as Siegenia, G-U, Roto and Kale.

Abir Metal's products are being used in different regions of the World including the countries Iraq, Iran, Algeria, Lebanon, Turkmenistan and of course Turkey. Therefore Abir Metal is used to work with local and international specifications, standards, norms and market conditions that are the need of today's products. On the other hand the special and custom made products are being also produced as the Client and Customer's desires.

Abir Metal is aware of about the materials and knows the materials are used in the product will show the product. Variety of colours with long term appearance are used according to the Client's and Customer's choices and the needs. The design of the product checked for not losing their functions, the strength of the product is tested. The Quality Control process is applied to all products at every stage of the manufacturing. Abir Metal has ISO 9001:2018 Quality Management System and the products of Abir Metal have Turkish Standards Institute (TSE) certification.

The services given by Abir Metal and their approach and distinguished from other suppliers/producers that are available in the market due to the fact that almost all members are production and manufacturing based for many years. Based on the distinctive approach, Abir Metal has the ability of to solve most problems that may occur during the development of product and foresee most of the risks that may occur in the future. Abir Metal is not only production and manufacturing company but also has vast experience and ability to actively manage and coordinate all phases of production in the field of all processes.

"AXIST" is registered brand of Abir Metal since 2011. Abir Metal aims to ensure the customers quality and performance needs with the AXIST products.

Abir Metal's priority is always customer satisfaction. Since the Abir Metal was an atelier, the company's recognition was always good, continually Abir Metal added more satisfied customers. The aim of the company is working harder for the performance expectations of the customers and add more customers to its portfolio.

ÇİFT AÇILIM MEKANİZMASI

ALUMINIUM TILT AND TURN SYSTEMS

AXIST ÇİFT AÇILIM MEKANİZMASI MONTAJ ŞEMASI

Ürünün performansı TSE tarafından aşağıdaki testler ile denenmiştir ve onaylanmıştır.

Korozyona Direnç : 96 saat korozyona maruz bırakılmıştır.

Dayanıklılık : Devirmeli ve döndürmeli olarak 25000 çevreme tabi tutulmuştur.

90 derece açılım 25000 çevreme tabi tutulmuştur.

İlave yük : 100 kg ilave yük eklenmiştir.

Makas Tipleri :

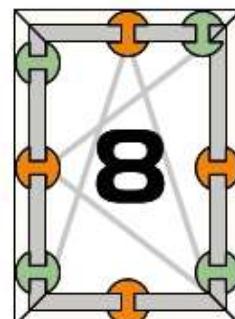

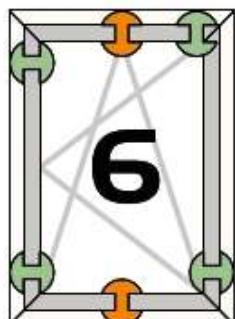

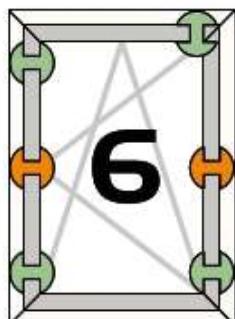

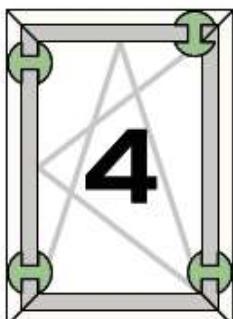

Uzun Makas : Tip 1 - G : (390 - 522mm) arası kanatları için kullanınız.

Kısa Makas : Tip 2 - G : (545 - 1700mm) arası kanatlar için kullanınız.

İlave Kilitleme Mekanizması

Pencerenin üst, alt ve yan kenarlarına uygulayacağınız ilave kilitlemelerle toplam kilitleme sayısını artıtabilirsiniz.

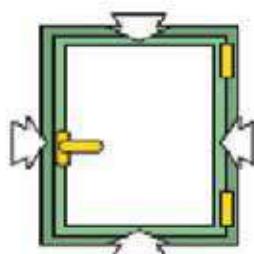

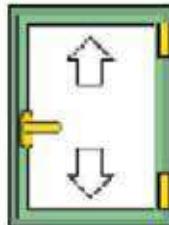

Mekanizmanın içindeki ayarlı karşılık ve pim sistemi ile kanat yerine monte edildikten sonra da ilave kilitlemeler oluşturulabilirsiniz. Bunun için yapılması gereken tek şey, tij çubuğuunda 8 mm'lik bir deliğin açılmasıdır.

AXIST montaj sonrasında hassas ayar imkanı sağlayan çift açılım sistemidir.

Kanat Yükseklik Ayarı

Kanat yüksekliği, dip menteşe karşılığında yer alan bir ayar vidası ile nominal değerlere göre **-0.5 mm ile +1.5 mm** arasında ayarlanabilir.

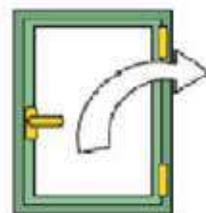

Kanat Basma Ayarı

Kanadın basma ayarı, ayarlı karşılıklar vasıtasıyla yapılabilir. Nominal değerlere göre, **+1.5 mm ile -1.5 mm** arasında ayar imkanı sağlanır.

Kanat Sarkma Ayarı

Kanat sarkma ayarı, makas üzerindeki bir **ayar vidası** ile yapılabilir.

Ayar İmkani: +1.5 mm ile -3.5 mm arasında

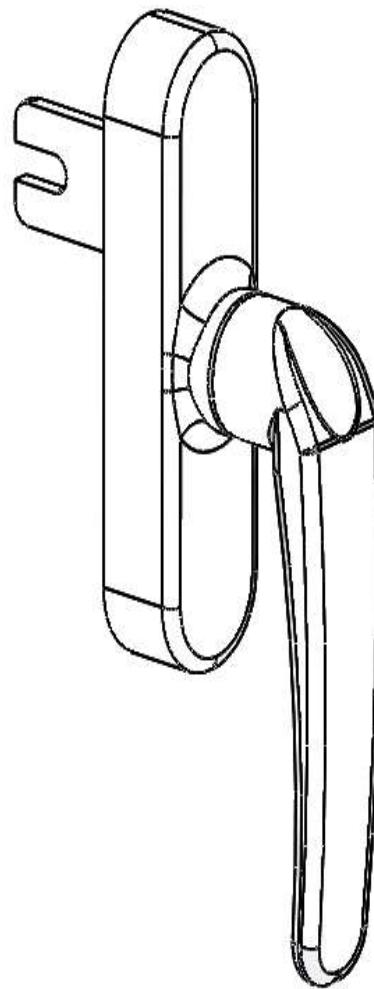

Emniyet Kilidi

Bu kilitleme sistemi ile **kanadın dışarıdan zorlanmaya karşı mukavemeti atılır**. Sistem iki parçadan oluşur: Kasaya monte edilen özel çengel karşılık ve tij çubuğu monte edilen mantar başlı pim.

ÜRÜN KATALOĞU

hayalden çizgiye, çizgiden hayatı...

PLANLAMA

Müşterimizin bizden talep ettiği contaların, takıldığı profiller ile beraber numunelerini temin ediyoruz. Ardından müşterimizin talepleri doğrultusunda, tasarım ile ilgili gerekli revizyonları planlıyoruz. Dijital ortamda contaların teknik resimleri çiziliyor. Müşterilerimizden gelen teknik bilgiler doğrultusunda, istenilen ham-madde özelliklerine göre fiyatlandırma teklifi yapılp müşterimize sunulur.

PLANNING

We provide the samples of the gaskets requested by us along with the profiles on which the customer is fitted. Then, necessary revisions are planned regarding the design in line with the demands of our customers.

Technical drawings of the gasket are drawn in digital environment. In line with the technical information coming from our customers, pricing offers are made according to the desired raw material properties and presented to our customers.

KALIP ÜRETİM SÜRECİ

Müşterimizin onayından geçtikten sonra containan kullanılacağı profili, camı, varsa aksesuarların çizimini yapıp montaj resmi hazırlıyoruz. Müşterimizin yazılı son onayından sonra, kalıp üretim sürecine geçiyoruz. Contaların kalibini kendi tesisimizde, CNC ve TEL-EROZYON makinelereinde 0.0005 mm hassasiyetinde üretiyoruz.

MOLD PRODUCTION PROCESS

After the approval of our customer, we draw the profile glass, which will use the gasket, if there is, we draw the accessories and prepare the assembly picture. After the last written approval of our customer, we proceed to the mold production process. The molds of the cones are produced in our own facility in computer controlled CNC and wire erosion machines with a precision of 0.0005 MM.

HAM-MADDE SEÇİMİ VE ÖZELLİKLERİ

Ürünün hangi coğrafi bölgede kullanılacağı, kullanım yeri, istenilen teknik özellik ve sertliğe göre ham-madde seçimini müşterimiz ile gerçekleştiriyoruz. Eğer talep edilirse müşterimizin getirdiği ürünü laboratuvar ortamında inceleyip, aynı teknik özelliklerde ve kalitede ham-maddeyi kendi tesisimizde üretiyoruz.

RAW MATERIAL SELECTION AND CHARACTERISTICS
After the selection of raw materials, the samples of the gaskets you request from us blend and produce with our 35 years of experience, with the love of our work, with the respect for our customers, and then we make free shipping to your address. After approving the samples you received, we proceed to the production process.

ÜRETİM VE SEVKİYAT

Ham-madde seçiminden sonra bizden talep ettiğiniz contaların numunelerini 35 yıllık tecrübemiz, işimize ve sizlere olan saygımız ile üretip sizlere ulaştırıyoruz. Onayınız alındıktan sonra üretim sürecine geçiliyor.

PRODUCTION AND SHIPPING

After the selection of raw materials, the samples of the gaskets you request from us blend and produce with our 35 years of experience, with the love of our work, with the respect for our customers, and then we make free shipping to your address. After approving the samples you received, we proceed to the production process.

HARD SOFT ALDOKS SEALS

فواصل مطاطية الدوكس اللينة والصلبة

ÖZELLİKLER FEATURES الميزات

- Co-extruzyon teknigi ile üretilmektedir.
- Co-ex ürünlerin kanala giren kısımları sert, profil kanalının dışında kalan kısımları yumuşak olarak üretilmektedir.
- Profil kanalına giren kısımların sert yapılmasındaki amaç ; montaj kolaylığı sağlama ve mevsimsel ısı değişimlerinde containın uzayıp kısalmasını önlemektir.
- Co-ex ürünlerin sert kısımları 100-110 şor, yumuşak kısımları 60-65 şor olarak üretilmektedir.
- Katalogda belirtilen ölçülerden farklı ölçülerde de üretim yapılmaktadır.
- Produced with co-extrusion technique.
- The parts of co-ex products into channels is hard but out from profile channel parts have produced soft.
- Aim the making hard parts into the profile channel is to get easiest montage and when in the season insulation changes joints against to extending and shortening.
- Produced are hard parts of the co-ex products are 100-110 shore and soft parts are 60-65 shore.
- The production can made in different sizes from the sizes specified in the catalog.

ÖZELLİKLER

FEATURES

الميزات

- PVC doğrama fitillerinde ısı, ses ve toz izolasyonu sağlamak amacıyla kullanılır.
 - Farklı Pen profili imalatı yapan firmaların kanallarına uygun şekilde kasa, kanat ve tozluk contaları olarak üretim yapmaktadır.
 - Kauçuk katkılı PVC ham madde ile conta üretimi yapılmaktadır.
 - İstek doğrultusunda TPE, TPV olarak conta üretimi yapılmaktadır.
 - Katalogda belirtilen ölçülerden farklı ölçülerde de üretim yapılmaktadır.
-
- Used to provide PVC joinery profiles in heat, noise and dust isolation.
 - Different Pen profile manufacturing firms to the proper channels at the checkout, we are producing the wing and leggings seals.
 - Joint is made of reinforced PVC raw material with rubber gasket.
 - We carry out the TPE, TPV joint to according requirement.
 - The production can made in different sizes from the sizes specified in the catalog.
